SOFTWARE DEVELOPMENT

I develop software via **github**. My scientific interest focuses on a collection of software packages which facilitate computations of sheaf cohomologies on toric varieties, see <https://github.com/homalg-project/SheafCohomologyOnToricVarieties>. These packages are written in the language **gap**, several of which designed as interfaces to C++-projects. Among others I am author of the following packages:

- TopcomInterface, cohomCAlgInterface, SpasmInterface
- ToricVarieties
- FreydCategories
- SheafCohomologyOnToricVarieties

For a complete overview of my software developments take a look at my ***GitHub-site*** <https://github.com/HereAround> or my ***academic website*** <https://martinbies.github.io/>.
